

July 11, 2011 • 1400–1800
San Diego Marriott La Jolla
4240 La Jolla Village Drive
La Jolla, California, USA

Agenda

- 2:00 – 2:30 *Rights-Based Management (RBM): An Overview*
An overview of the rights-based management in the allocation of natural resources as a foundation for allocation of rights strategies today and in the future.
Presenter: **John Ledyard**
- 2:30 – 3:00 *Entry, Allocation and Properties of Rights Issues*
An in-depth analysis of limitation, duration, and transferability of rights as outlined in the ISSF Allocation Workshop (Feb 2011) report, "Allocation of Rights in the International Environmental Context."
Presenter: **Scott Barrett**
- 3:00 – 3:20 *Current RFMO Management Measures*
Overview of tuna RFMO catch and effort limits and/or allocation schemes adopted to date.
Presenter: **Victor Restrepo**
- 3:20 – 3:40 *Forms of Rights-Base Management*
A review of the Bellagio Framework, the IATTC Purse Seine Capacity resolution as a form of rights-based management, and how stronger forms of RBM would further enhance conservation and socio-economic benefits.
Presenter: **Robin Allen**
- 3:40 – 4:00 *Case Studies of Existing RBM*
Diverse, successful rights-based management implementations in the developing world.
Presenter: **Vishwanie Maharaj**
- 4:00 – 4:30 *Building Technical Capacity for RBMs*
Overview of the infrastructure, including monitoring and enforcement, which would be needed at the RFMO level, and in individual countries, for successful RBM implementations.
Presenter: **Stan Crothers**
- 4:30 – 6:00 **ROUNDTABLE DISCUSSION**
A panel of regional experts will discuss ways to move Rights-Based Management forward. RBM in tuna fisheries is not a panacea, but it is an essential component in a creating a sustainable future. Time will be provided for questions from the audience.
Moderator: **Robin Allen**
